SHARATKUMAR G HULLI

Bengaluru, Karnataka
9901180325 sharatkumarhulli201@gmail.com linkedin.com/in/sharatkumar github.com/sharat

Education

Presidency University, Bengaluru **2022 – 2026**
Bachelor of Technology in Computer Science and Engineering *Bengaluru, Karnataka*

Sainik School,Kodagu **2021 – 2022**
Class XII *Kodagu, Karnataka*

Relevant Coursework

- Computer Networks
- Operating System
- Artificial Intelligence
- DSA
- Software Engineering
- Cloud Computing
- DBMS
- Machine Learning

Experience

Infosys Springboard Internship Program **July 2026 – Present**
Full-Stack Java Developer Intern *Remote*

- Building a full-stack shipment tracking platform using React.js and Spring Boot microservices, implementing JWT/OAuth2 authentication with role-based access control across five user roles.
- Developing real-time shipment tracking and live delivery monitoring features using PostgreSQL and WebSocket connections, integrated with the Google Maps API for route visibility and ETA prediction.
- Designing proof-of-delivery workflows with digital signature capture and photo upload, and building notification services (email, SMS, push) for shipment updates and delivery alerts.
- Creating analytics dashboards using Chart.js with PDF/Excel report export, with deployment planned via Docker and GitHub Actions CI/CD pipelines.

Projects

Automated Cattle Breed & Disease Diagnostics | *Python, Flask, Machine Learning, Jupyter* **2026**
* Developed a hybrid EfficientNet-B3 + Vision Transformer (ViT-B/16) model to classify 15 Indian cattle and buffalo breeds, achieving 87.5% validation accuracy.
* Built and optimized deep learning models in Jupyter Notebook using advanced image preprocessing and augmentation techniques to improve classification performance.
* Designed a full-stack Python, HTML, CSS, and JavaScript web application for real-time cattle breed and disease diagnosis using PyTorch models.
* Implemented mixed-precision (AMP) training, early stopping, and adaptive learning rate scheduling to accelerate GPU training and improve model convergence.

Employee Management System | *Java, Spring Boot, JWT, REST APIs* **2026**
* Developed a secure, scalable RESTful backend using Java and Spring Boot to handle enterprise-level employee data and department workflows.
* Implemented stateless user authentication and authorization using JWT to secure distinct administrative, manager, and employee endpoints.
* Structured core application layers (Controllers, Services, Repositories) and comprehensively validated all API endpoints using Postman.

Student Dropout Analysis | *Python, Flask, TensorFlow/Keras, Scikit-learn* **2025**
* Developed a complete ML platform to predict student dropout risk using data preprocessing, classification algorithms, and model evaluation.
* Built an interactive dashboard to visualize risk factors and help institutions plan early interventions.
* Integrated SHAP framework for transparent, interpretable predictions to stakeholders

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL
Developer Tools: VS Code, Eclipse, Google Cloud Platform, Android Studio
Technologies/Frameworks: Linux, Jenkins, GitHub, JUnit

Certifications

- Software Engineering and Agile software development – Springboard
- The Complete Full-Stack Web Development Bootcamp – Udemy
- Led a team to secure the second place in "Internship Hackathon" organized by Presidency University
